Dear Professor Doria,

This is a short note to thank you for your excellent review of the article by Stephen Theriault which is now available as item MR2973392 on MathSciNet; please see the attached. We at MR are well aware of the effort that it requires to write such reviews and are very proud to be able to publish them. They are of great value to the mathematical community and are first class works of scholarship also.

Best regards,

Graeme Fairweather

:Dear Graeme,

I am grateful for your comment. In fact, the paper has astonishing result, not yet clear the physical meaning.

Yours,

Celso
